

FIGURE 2. RELATIVE RISK OF INCIDENCE AND MORTALITY FROM DIARRHOEA AND PNEUMONIA FOR PREDOMINANT, PARTIAL AND NON-BREASTFED INFANTS AGED 0–5 MONTHS COMPARED WITH BREASTFED INFANTS

Note: Relative risk of incidence of and mortality from diarrhoea and pneumonia for partial breastfeeding and not breastfeeding; compared with that for exclusive breastfeeding among infants aged 0–5 months. A relative risk of 1.0 indicates the same risk incurred as for exclusively breastfed children. Relative risks above 1.0 indicate increased risk.
